Changing families' use of heating and cooling systems

FIESTA aims to cut down families' home energy consumption and related emissions, by fostering their investments in production from renewable energy sources and by leading them to purchase more energy-efficient heating and cooling systems.

Did you know?

29%

of final energy consumption takes place in the household sector

66%

of the home's utility costs is due to domestic heating and cooling

Lack of appropriate information and incentives is the main barrier to the improvement of energy efficiency in households

understand

enable families to get to know their consumption patterns

think

help them consider the cost-effectiveness of readapting their habits

act

engage them in energy efficiency actions

save

enable energy savings in households

help desks

Each partner Municipality will provide families with direct and door to door assistance on domestic energy issues

lotteries

Families resorting to FIESTA energy-saving services will have the opportunity to win energy-efficient products. So save and win!

BOOK YOUR FREE energy audit

visit our website, book your free energy audit and start saving

2100 FAMILIES

consumers' groups

Ensure energy-efficient purchase of heating and cooling systems at good value for money for families

workshops

for schools

make future generations aware of how easily energy can be saved at home

for social housing residents

help vulnerable consumers to "get more with less"

for installers & retailers

devise win-win solutions benefitting families and retailers/installers alike

134 toe/year of production from renewable energy systems

500.000 € cumulative investments made by households

328 toe/year energy saving (1,130 t reduction of CO2 emissions)

30 European local authorities will commit to replicate the FIESTA model
